

Biometrics4ALL LiveScan Systems Helping Merced County Sheriff Speed Up Criminal Bookings

Biometrics4ALL announces today that its industry leading tenprint and palmprint criminal booking systems have helped the County of Merced, CA Sheriff's Department add full palmprint acquisition without increasing overall booking time. Biometrics4ALL's kiosk style booking station comes standard with latest scanner hardware, height adjustable capture surface, all-steel construction, ergonomic designs that accommodate full size keyboard and mouse, and sophisticated LiveScan booking software.

Biometrics4ALL shipped the ordered systems, installed, integrated, and trained the Sheriff staff in one week. Sergeant Bobrowski, Merced County Sheriff Department, stated, "We were extremely impressed with Biometrics4ALL's efficiency, quality of the LiveScans products delivered, ease of use, and knowledgeable staff. Biometrics4ALL implementation team came in, installed the systems, performed in field testing, trained our staff, then left, and the systems have worked well since. Our officers were able to quickly adapt to the new systems and we are now processing bookings faster than before, submitting error free and high quality data to the state, and providing vastly improved public protection and crime solving efforts with the addition of palmprint images capture to our standard booking process".

It has been established that around 30% of the prints lifted from crime scenes are palm prints. Collecting the palmprints at the time of booking allows the Sheriff's Department to solve more crimes by matching the latent palmprints with known criminals. Biometrics4ALL LiveScan solutions are designed to increase the throughput of the departments booking stations, while remaining flexible to changes required by state agencies. The officer using the system gets real-time fingerprint quality feedback in conformance to the latest Department of Homeland Security standards. Based on quality and sequence verification feedback, the officer is able to immediately take corrective actions to ultimately improve the quality of biometrics records and improve apprehension rate.

To simplify and improve data-entry accuracy, Biometrics4ALL incorporates several key features such as importing and exporting booking data via GJXDM conforming Extendable Markup Language (XML) files, wide use of pick-lists, driver license reader, barcode reader, and criminal charge SmartPicker™. Additionally, the systems are equipped with touch-screen to assist the officers easily navigate the screens during the booking process.

Since initial delivery, Biometrics4ALL has lived up to its innovative reputation by delivering several product improvements without charging the County any additional fees. "Biometrics4ALL delivered new features and product improvements a few months after initial implementation. These upgrades have provided substantial benefits to our day to day operation. The product is performing exceedingly well and we look forward to receiving other innovations by Biometrics4ALL." Sergeant Bobrowski added.

Edward Chen, Biometrics4ALL Managing Director said: "We are privileged to have the opportunity to serve the County of Merced. Supplying the county with both criminal and applicant LiveScan solutions shows the versatility of our software solutions. The Sheriff's Department has utilized our LiveScan solutions for the past nine months without any incidence clearly demonstrates our product quality and stability for both criminal booking and applicant processing. We are committed to continuous improvements; think outside of the box for new features that benefits our customers; and delivering them to our customers without the historic absorbent charges".

About Biometrics4ALL, Incorporated

Biometrics4ALL Incorporated is a leading multi-biometrics technology company. Biometrics4ALL provides innovatively architected and rapidly adaptable live scan and identity management solutions, specifically designed to enable government agencies, public service companies, and system integrators to provide applicant background checks; identify, book, and release criminals; and supply critical components to large ID management projects such as the PIV, FIPS 201, US-VISIT, and EU-VIS.

The company's product line includes live scan products, central data management servers, and FBI certified printing solutions. Our transaction routing and management service provides efficient and cost effective background check processing with submissions to the FBI and its channeling agencies such as the OPM, ABA, NIGC, and the state agencies.

With our flexible business logic engine, multi-language capability, broad range of biometrics capture devices, and a strong customer base; Biometrics4ALL is well positioned to serve the government, financial, transportation and gaming identity management markets. Biometrics4ALL products meet all applicable FBI, RCMP, FIPS 201, NCIC and ANSI/NIST standards.
