

NEC PARTNERS WITH BIOMETRICS4ALL TO DELIVER TOTAL IDENTIFICATION SOLUTION FOR STATE AND LOCAL AGENCIES

NEC Corporation of America, a premier provider of IT, network, and identity management solutions, together with Biometrics4ALL, a leading multi-biometrics technology company, today announced the introduction of the LiveScan product family, state-of-the-art technology to meet civil and law enforcement identification demands. The collaboration with Biometrics4ALL enables NEC to offer a fast and accurate end-to-end solution, from identification to booking.

LA County's Purchasing and Contracting Division awarded this contract to Biometrics4ALL after careful evaluation of all of the major vendor's products. The process was comprised of a written technical response and hands-on testing by an evaluation committee including the LA County Sheriff's Department. A majority of LiveScan and Automated Fingerprint Identification System (AFIS) vendors participated in this bid (e.g., Identix, Cross Match, and Cogent Systems).

Biometrics4ALL offered the most economical solution meeting all of the mandatory requirements and offered an upgrade path to the new FBI applicant Flat ID standard. LA County Sheriff's Department Lieutenant Larry Bryant said: "We look forward to using the Biometrics4ALL LiveScans. The new software significantly simplifies the processing of applicants. Biometrics4ALL not only delivered the most cost effective solutions, they have also proven to be extremely responsive to our expanding and changing needs."

Edward Chen, Biometrics4ALL Managing Director said: "We are excited to have the opportunity to serve such a marquis account as LA County. Supplying LiveScan solutions to the most populous county in the United States is evidence of our dedication to customer service and product superiority. Shipping over 60 LiveScan systems, most of which were delivered within 4 weeks from receipt of order, proves that Biometrics4ALL can quickly and reliably deliver high quality products tailored to its customers' needs."

In recent years stringent background checks have become mandated for such occupations as teachers, volunteers, hazardous material drivers, emergency services personnel, etc... Furthermore, in response to 9/11, Homeland Security Presidential Directive (HSPD -12) imposes strict standards for Personal Identification Verification (PIV), requiring every government employee and contractor to submit their fingerprints for a background check. Since the LiveScans acquired under the LA County contract are used for background check submissions to the FBI and Cal-DOJ, Biometrics4ALL has positioned itself as a leading solutions provider in the background check market.

About Biometrics4ALL, Incorporated

Biometrics4ALL Incorporated is a leading multi-biometrics technology company. Biometrics4ALL provides innovatively architected and rapidly adaptable live scan and identity management solutions, specifically designed to enable government agencies, public service companies, and system integrators to provide applicant background checks; identify, book, and release criminals; and supply critical components to large ID management projects such as the PIV, FIPS 201, US-VISIT, and EU-VIS.

The company's product line includes live scan products, central data management servers, and FBI certified printing solutions. Our transaction routing and management service provides efficient and cost effective background check processing with submissions to the FBI and its channeling agencies such as the OPM, ABA, NIGC, and the state agencies.

With our flexible business logic engine, multi-language capability, broad range of biometrics capture devices, and a strong customer base; Biometrics4ALL is well positioned to serve the government, financial, transportation and gaming identity management markets. Biometrics4ALL products meet all applicable FBI, RCMP, FIPS 201, NCIC and ANSI/NIST standards.
